

MADISON COUNTY COMMUNITY HEALTH IMPROVEMENT PLAN

A Collaborative Project between the Department of Health in Madison County and
Madison County Memorial Hospital

March 2019 – December 2021

Updated January 2021

**Department of Health Mission**

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Department of Health Vision

To be the healthiest state in the Nation

Department of Health Values (ICARE)

Innovation: We search for creative solutions and manage resources wisely.

Collaboration: We use teamwork to achieve common goals and solve problems.

Accountability: We perform with integrity and respect.

Responsiveness: We achieve our mission by serving our customers and engaging our partners.

Excellence: We promote quality outcomes through learning and continuous performance improvement.

**Madison County
Memorial Hospital**

Madison County Memorial Hospital Mission

To enhance the quality of life by continuously improving the health of the people of our community.

Madison County Memorial Hospital Values

Faith, Family, and Local History

Madison County Memorial Hospital Implementation Strategy for its 2017 Community Health Needs Assessment

**The Department of Health in Madison County and Madison
County Memorial Hospital collaborated on the development of
the Community Health Improvement Plan.**

Executive Summary

The Department of Health in Madison County and Madison County Memorial Hospital have collaborated to produce the 2018 Updated Community Health Improvement Plan for Madison County. This meets the requirements for both entities to involve the community in a participatory process to plan health priorities for the next three years and monitor progress toward meeting those goals and strategies.

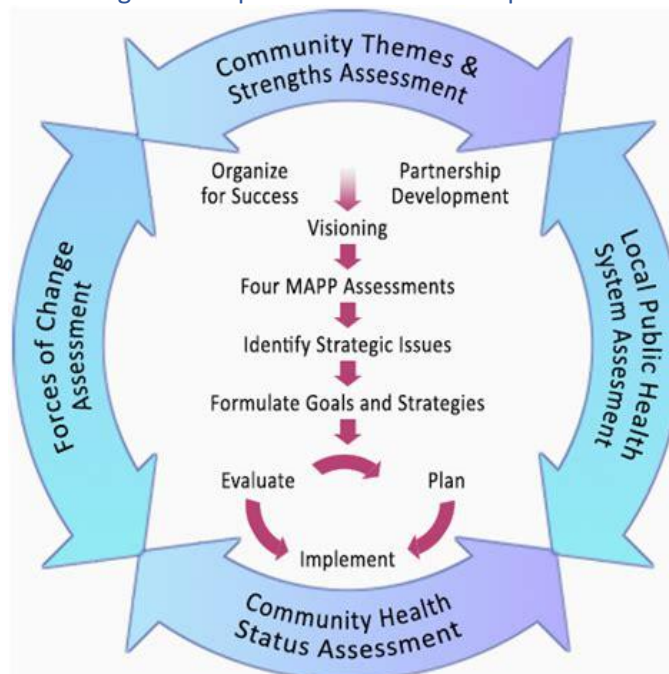

The recent Community Health Assessment (CHA) informed the Madison County community about demographic and population trends for the purposes of decision making, the prioritization of health problems, and the development, implementation, and evaluation of community health improvement plans. The purpose of the Community Health Improvement Plan is to identify long-term and short-term goals and strategies to address priority areas identified by the community health improvement team.

Mobilizing for Action Through Planning and Partnerships (MAPP) Process

The Mobilizing for Action Through Planning and Partnership (MAPP) process has been used for both the Community Health Needs Assessment and the Community Health Improvement Plan. The CHIP is the continuation of the CHNA that began in June 2017. The CHA process included the four assessments as indicated below:

- The Community Themes and Strengths Assessment
- The Forces of Change Assessment
- The Community Health Status Assessment
- The Local Public Health Assessment

Figure 1. Representation of MAPP process

Community Themes and Strengths Assessment

The Community Themes and Strengths Assessment identifies issues that residents of the community deemed as the most important along with distinguishing any resources available to aid in improving the health of the community.

The Community Themes and Strengths Assessment was performed from July 2016 until March 2017 by direct solicitation of residents to complete a standardized survey. Residents were approached at county school board meetings, county commission meetings, community events, health fairs and at local establishments. Residents had the option to complete a printed survey or to access a survey monkey link to complete the survey on-line.

Community Health Status Assessment

The Community Health Status Assessment distinguishes and prioritizes quality of life and community health issues.

The updated data were presented to subcommittees during January through March 2019. Community participants reviewed the data and status toward achieving 2021 objectives. The group chose the objectives that will be addressed during 2019-2020.

Local Public Health System Assessment

The Local Public Health System Assessment answers the questions, "What are the components, activities, competencies, and capacities of our local public health system?" and "How are the Essential Services being provided to our community?" The assessment involves the use of a nationally recognized tool called the National Public Health Performance Standards Local Assessment Instrument.

The Local Public Health Assessment was divided into two parts, an external assessment and an internal assessment. The external assessment was held at Madison County Memorial Hospital on June 21, 2017. During that time, participants discussed Essential Public Health Services 3, 4, 5, 7, and 9. The internal assessment was held on August 9, 2017, at the Department of Health in Madison County. Essential Services 1, 2, 6, 8, and 10 were addressed.

Forces of Change Assessment

The Forces of Change Assessment focuses on recognizing forces or factors/trends that will affect the health of the community and the local public health system.

The Forces of Change Assessment was performed on August 22, 2017 at the Madison County Extension Office to identify community strengths, weaknesses, opportunities and threats in specific topic areas.

Community Health Improvement Process

The Community Health Assessment process ended with identifying strategic issues (see Figure 1, page 8). The Community Health Improvement process will result in the formulation of goals and strategies, implementation of the goals and strategies, and evaluation of the progress toward accomplishing them. Progress will be reported quarterly. The revision of goals and strategies will be addressed annually, along with the annual progress report.

Limitations

All data presented to CHA participants were current as of March 2019 and whenever possible, comparisons were made between Madison County and the state of Florida as a whole. Some trend lines presented three-year rolling rates to control for static trend lines and years where the rate was zero. Three-year rolling rates can give a more fluid view of the overall trend up or down.

It should be noted that qualitative data from the Community Themes and Strengths Assessment, and the Forces of Change Assessment were representative of the persons who participated in the assessment. Data may or may not be generalizable to the entire Madison County community.

All survey data, such as Behavioral Risk Factor Surveillance System (BRFSS) and Florida Youth Substance Abuse Survey (FYSAS) were used as supplemental information to further inform the group about health indicators. These data can offer supporting or negating documentation of health indicators found in Florida CHARTS and other quantifiable sources.

Goals, strategies and objectives developed for the CHIP are community-wide strategies and do not pertain to any specific individual. All residents should consult with their primary care practitioner to develop a personalized health improvement plan.

Visioning Statement

Visioning is a technique that is used to support a group of stakeholders in developing a shared vision of the future. It is a process that facilitates the direction of the planning process and creates the foundation for the Community Health Assessment (CHA) and the Community Health Improvement Plan (CHIP). Prior to beginning the data presentation on the health indicators in Madison County, a Themes and Strengths Visioning Assessment session was conducted. After a brief discussion about ideal qualities of health, the attendees were asked two significant questions, “What does a healthy community mean?” and, “What are the characteristics of a healthy Madison County?” The participants worked independently and collectively to identify common community themes and strengths and brainstormed to discuss and answer the above questions. Answers were self-recorded on a notecard and then placed on a sticky wall in the front of the auditorium. Once responses were compiled, the attendees conjoined as each reaction was read aloud and categorically placed. Accordingly, the community members envisioned a healthy Madison County to have (1) access, (2) comprehensive, collaborative cooperation, and (3) resource and infrastructure development.

Creating the vision included participants conducting group discussions and creating several vision statements that reflected on the themes and key values examined throughout the summit. Although all of the statements varied, the priority key values were consistent in all of them. Each statement was presented and the community members voted to select the ideal vision statement for Madison County. After minor revisions, by a show of hands, the partners favored the adoption of, *“Working together to make Madison County healthy through education, dedication, unity, and support,”* as the new vision statement.

Vision Statements

The vision statements developed by the five groups were:

- By 2022, Madison County will be a community that will have access to greater health resources through infrastructure development as a result of community collaboration and cooperation.
- To promote collaborative access to resources for a holistic, healthy community.
- Madison County will be a place where the citizens, businesses, and healthcare community unite to ensure the availability of resources to access what we need to be the physically, mentally, socially, emotionally, and spiritually healthy community we aspire to be.
- By 2022, Madison County will provide unparalleled health services through a synergistic approach to strong infrastructure, informative access, and unbiased collaboration that creates a unified standard of community health.
- Making Madison County healthy one life at a time through the collaboration of agencies to create overall health in the community.

Working Together to Make Madison County Healthy through Education, Dedication, Unity, and Support

During the visioning session, members were asked to establish common themes and strengths of two significant questions: “What does a healthy community mean?” and “What are the characteristics of a healthy Madison County?” Based on the participants’ ideas, a series of community-led, open-ended discussions were conducted, which identified three reoccurring themes:

We, the community, envision a healthy Madison County to have (1) access, (2) comprehensive, collaborative cooperation, and (3) resource and infrastructure development.

Table 1. Visioning information by Category

(1) Access	
<i>We desire Madison County to be a place where everyone:</i>	<i>We want to create a community that encompasses:</i>
Has access to care for all populations	Health care resources (mental, physical, spiritual, and substance abuse help)
Has access to education, mental health services, and substance abuse treatment	Un-fragmented system of care
Has resources to meet the needs of residents:	Specialized health training
<ul style="list-style-type: none"> Health care 	<ul style="list-style-type: none"> Comprehensive health care availability
<ul style="list-style-type: none"> Mental and social health 	Local, affordable health care access with quality care
<ul style="list-style-type: none"> Transportation 	Vibrant ancillary services – including rehabilitation and nursing homes
<ul style="list-style-type: none"> Education 	Access to preventative resources and public health availability
<ul style="list-style-type: none"> Employment 	Coordination of hospital and public health services
Knows what resources are available and where to find them	Healthy babies
Has healthy food options and access to grocery stores with affordable choices	<ul style="list-style-type: none"> Higher birth weights, lower body mass index (BMI), lower teen pregnancy, and lower STD rates
Has access to parks and recreational activities	Improved nutritional food options to support a healthy lifestyle
Has opportunities for residential activities	Safe built environments free from crime, drugs, and police brutality
Removes silos to allow everyone to support needs	Career and education opportunities
	Cooperation among residents

(2) Comprehensive, Collaborative Cooperation

A healthy community is one that is:

Knowledgeable of the concerns of its citizens	Able to provide quality healthcare
Able to identify health needs	Can react and/or provide timely services
Thriving – where everyone is moving forward (i.e. health, economics, and education)	Tailors community development of creative solutions to address the issues of citizens
Conducts monthly community town hall meetings to resolve issues	Reaches common goals together as a group
Puts positive words into successful actions	Increases faith based outreach and participation
Unified	

(3) Resource and Infrastructure Development

We desire Madison County to be a place with improved infrastructure – medical facilities, businesses, and opportunities – that is more enticing for people to move here.

What does a healthy community look like?

Residents thriving in all aspects of their lives to include physical, emotional, financial, and social well-being and health	A community with services such as hospitals, public health senior center, day care, and psychological counseling that meet the health and family needs
A healthy community is one that not only has jobs, but good paying jobs	Attractive environments for businesses and professionals
Well maintained roads, bridges, sewer systems, and water infrastructure	Access to good schools and colleges
Steady growth and planning	Progressive infrastructure
Adequate medical facilities	Controlled/low crime rates

To achieve optimal health activity, Madison County needs to:

- Conduct root cause analyses to strategically create a better future
- Further develop resources (economic, health, education) to create a strong community
- Take ownership of social determinants of health

Key Findings

The following significant data trends were presented at the Community Health Status Assessment. Detailed trends by priority area are available in the 2017 Madison County Community Health Assessment document.

Demographics

- 2017 population data by census tract indicate that tract 1103.02 is the most populated tract with 32% of the population. This includes the southern part of the city of Madison.
- 2017 population statistics indicate Madison County had a slightly higher percentage of males (53%) than females (47%). The state of Florida had slightly more females than males.
- Madison County had a higher proportion of Black, non-Hispanic residents (42%) than the state of Florida (24%). Census tract 1103.02 had the highest percentage of Black, non-Hispanic residents.
- Hispanics accounted for 5% of Madison County's population and 33% of the state's population. Census tract 1104 had the highest percentage of Hispanic residents in Madison County.
- Census tract 1104 had the highest percentage of school-age children, followed by 1102. Tract 1102 has the highest percentage of children under age 5.
- Madison County residents were less likely to have a college degree (12.5%) when compared to the state of Florida (25.6%). However, Madison County's percent increased from 2016 and the state's decreased.

Socioeconomics

- Madison County ranked last out of 67 counties for median household income in 2017. Madison County was identified as the poorest county in Florida in 2017.
- Approximately 31.9% of families in Madison County lived in poverty in 2017, compared to 10.3% for the state of Florida. Census tract 1102 had the highest percent of families living under 100% poverty.
- Over half (51.4%) of Madison County residents under age 18 lived in poverty in 2017 compared to 22.3% for Florida.

Health Insurance and Medicaid

- Approximately 17% of adults and 6% of children are uninsured in Madison County. Census tract 1104 had the highest percentage of the population with no health insurance.
- Of the 2017 births to Madison County residents, 73% were covered by Medicaid, compared to 48.9% for Florida.

Health Equity

- The Community Health Improvement Plan includes a section on health equity and some action steps toward achieving health equity in Madison County.
- White, non-Hispanic persons represent 53% of Madison County's population. This population has been disproportionately affected in the areas of diabetes, hypertension, heart disease, stroke, cancer, firearm discharge deaths, suicides, and drug overdose deaths.
- Black or Other Race, non-Hispanic persons comprise 42% of Madison County's population. The data show that this population is disproportionately affected in the areas of chlamydia, gonorrhea, HIV, syphilis diabetes, hypertension, heart disease, infant mortality, low birth-weight births, mothers who initiate breast feeding motor vehicle crash deaths, drowning deaths, and homicide deaths.

- Hispanic persons of all races comprise 5% of Madison County’s population. This population has been disproportionately affected in chlamydia, gonorrhea, low birth-weight births, preterm births, deaths due to unintentional fires, firearm discharge deaths, and suicides.

Leading Causes of Death

- The leading cause of death in Madison County for calendar year 2017 was cancer, followed by heart diseases, chronic lower respiratory disease, and cerebrovascular diseases. The leading two causes of death were consistent by race and ethnicity.
- It is worth noting that homicide was the seventh leading cause of death for black, non-Hispanic residents of Madison County.

Reportable Diseases

- Chlamydia cases have increased for Madison County and have increased among females ages 15-19, a group where reproductive health issues can be affected.
- Gonorrhea cases have increased for Madison County but have decreased among females ages 15-19.
- HIV cases slightly increased in 2017, while AIDS cases have remained consistent since 2015. This may suggest issues with access to medical care, adherence to medications or other related medical issues. The percentage of Madison County residents with HIV/AIDS who had a suppressed viral load was lower when compared to the state.
- Madison County has experienced five cases of vaccine-preventable diseases since 2010, including pertussis (two cases) and varicella (three cases).

Environmental Health

- There have been four deaths and 200 hospitalizations due to asthma since 2000. A total of 149 of the 200 hospitalizations were among the age group of 1-5.
- There were three lead poisoning cases between 2010 and 2017.

Chronic Diseases

- Death rates for diabetes, hypertension, stroke, heart attack, and cancers are higher for Madison County than for Florida.
- Madison County has a higher percentage of smokers than the state of Florida.
- Reported use of electronic cigarettes has dramatically increased in Madison County youth, from 4.8% in 2012 to 16.4% in 2018.

Maternal and Child Health

- Most of the infant deaths in Madison County from 2010 to 2017 were linked to late entry to prenatal care, premature delivery, low or very low birth weights and Sudden Infant Death Syndrome.
- Percentages of very low birth weight and low birth weight have been consistently higher in Madison County than for Florida.
- Preterm births increased dramatically in 2017.
- Breastfeeding initiation rates are lower for Madison County than Florida.
- Births to teen mothers decreased in 2017.

Injury and Violence

- Unintentional injury ranked as the fifth highest cause of death in Madison County in 2017.
- Motor vehicle crash rates, alcohol-suspected vehicle crash rates, and alcohol-suspected vehicle crash injury rates were higher in Madison County, compared to Florida.
- During the period of 2010-2017, there were 12 drowning deaths, 26 deaths due to falls, eight deaths due to fires, 11 deaths due to medical and surgical complications, and 19 deaths due to accidental poisoning in Madison County.
- During 2010-2017, there were 11 homicide deaths.
- Aggravated assault rates have been consistently higher in Madison County compared to Florida.

Social and Mental Health

- Reported domestic violence incidents have increased in Madison County since 2013.
- The suicide death rate was lower in Madison County than in Florida as a whole but is increasing slightly.
- There have been 13 drug overdose deaths in Madison County since 2007.
- Hospitalization rates for mental disorders are lower in Madison County than the state, except for schizophrenic disorders.
- Black, non-Hispanic women were most likely to report having a depressive disorder when surveyed through the 2016 Behavioral and Risk Factor Surveillance System.
- Middle and high school students surveyed through the 2018 Youth Substance Abuse Survey reported high usage of alcohol, marijuana, inhalants and synthetic marijuana.
- Approximately 43% of middle school and 36% of high school students reported symptoms of depression.

Priority Area Plans

While all of the health indicators are important, the community participants were asked to choose three areas that would be addressed by the development of the 2018-2021 Community Health Improvement Plan. Participants voted during the Community Health Assessment and the areas chosen to address were Chronic Disease, Maternal and Child Health, and Social and Mental Health.

The individual community organizations will continue to address communicable diseases, environmental health, emergency planning and injury/violence both separately and as an integrated entity when applicable. Listed below are the goals and strategies for all of the priority areas that were developed by the CHA team members.

Reportable Infectious Diseases

Priority Areas	The priority area chosen by the group was HIV
Issue	The issue was defined to be 100% of the newly diagnosed cases affect the African American community
Goal	A reduction in the newly reported HIV cases of 25% by 2022
Barriers	Lack of knowledge and education in the community. Accessing the community to provide the proper education and resources
Agencies Involved	Healthy Start, Big Bend Cares, Health Department, Neighborhood Health Services, health care providers, Big Bend Rural Health Network, Bond Community Health Center, Madison Correctional Institution, Madison County Sheriff's Office (Jail), churches, North Florida Community College, Madison County Memorial Hospital
Next Steps	The next steps to address this issue involves getting our boots on the ground and getting into the community

Chronic Diseases

Priority Areas	COPD, Hypertension, CHF, Diabetes, Reduction in Nicotine Use
Issue	Decreased life expectancy due to chronic diseases
Goal	Reduce Chronic Disease Mortality by 10%.
Barriers	Access to primary care, educational level/literacy rate, access to specialty care, transportation, financial, no support system (family, personal support), lack of motivation
Agencies Involved	Health Department, Madison County Memorial Hospital, Big Bend AHEC, Big Bend Transit, Madison Shuttle, private physicians, Emergency Management Services, Department of Children and Families, County Extension Office, North Florida Community College, Senior Center
Next Steps	Work with local physicians to educate and engage the community.

Maternal and Child Health

Priority Areas	Infant mortality
Issue	Low birth weight, breastfeeding, late entry to prenatal care, obesity during pregnancy
Goal	Be below the state average in infant mortality in five years.
Barriers	Lack of consistency in data collection, apathy, geographical isolation (lack of resource availability), No Regional Intensive Perinatal Care Center, Labor and Delivery, Intensive Care Units, or Obstetrical providers.

Agencies Involved	Healthy Start Coalition, Health Department, Brehon, Kids Inc. (limited), TMH OB providers.
Next Steps	Focus on gaps, social determinants of health, toxic stress, and how it is normalized, evaluate data from mothers and babies curriculum implemented and healthy start (stress reduction), focus on breastfeeding professional support, evidence-based intervention, healthy start redesign, Obstetric provider input.

Injury and Violence

Priority Areas	Homicide
Issue	Lack of education, unemployment, lack of family cohesiveness, drug use, gun availability
Goal	Lower homicide rate by 50% in five years, improve graduation rates, establish mentoring programs for youth
Barriers	Lack of resources, funds, parks/playgrounds, slim tax base
Agencies Involved	City/county government, public assistance agencies, law enforcement, health department, school district, NFCC, St. Leo University
Next Steps	Engage community and partner agencies

Social and Mental Health

Priority Areas	Mental health services
Issue	People do not know where to go for services
Goal	Establish a mental health service referral guide, establish joint primary care and behavioral care locations, establish strong community partnerships, utilize social media, utilize 211 app
Barriers	Limited number of behavioral health providers, lack of communication between partners, stigma, treatment cannot be forced on people
Agencies Involved	Apalachee Center, DISC Village, Law enforcement, Faith community, Madison County Memorial Hospital, Big Bend Transit
Next Steps	Communication, networking, presence at community events, school orientation

All of the groups identified data tracking and analysis as an area where assistance was needed in order to meet goals.

Community Health Improvement Plan Process

The Madison County Community Health Improvement Plan Steering Committee decided to alter the meeting process for this cycle. Three subcommittees were created to address the three priority areas of Social and Mental Health, Maternal and Child Health, and Chronic Diseases. These subcommittees met during the first quarter of 2019 to develop long and short-term goals in their respective priority area, and to establish a meeting schedule for 2019.

Social and Mental Health Subcommittee

The Social and Mental Health subcommittee met on January 16, 2019 in Tallahassee, Florida. Local providers and persons interested in social and mental health services in Madison County were present at the meeting.

The group reviewed the status of the 2018 workplan and barriers or issues that prevented the completion of objectives. From there, the group developed the goals, strategies, objectives and action steps listed below for 2019.

Next Steps

The subcommittee members agreed to meet quarterly to advance progress with short and long-term goals. The next meeting is scheduled for April 16, 2019. The group will finalize the community-based survey format, discuss the sampling methods and continue work on a linkage and referral plan between the school district and family service agencies.

Maternal and Child Health Subcommittee

The Maternal and Child Health subcommittee met on February 12, 2019 in Monticello, Florida. Local providers and persons interested in maternal and child health services in Madison County were present at the meeting.

The group reviewed the status of the 2018 workplan and barriers or issues that prevented the completion of objectives. From there, the group developed the goals, strategies, objectives and action steps listed below for 2019.

The subcommittee decided on a community education approach to increasing breastfeeding initiation rates that would operate in tandem with the clinic initiatives of DOH-Madison and the Healthy Start Coalition. It was decided to work with local businesses to establish breastfeeding sites on their premises and to purchase signage. The subcommittee is also working on a marketing campaign designed to encourage pregnant women to seek obstetrical care in their first trimester.

DOH-Madison staff consulted with the Vital Registrar to submit a sample of 2018 birth mothers receiving services at the health department for comparison purposes with variables for prenatal entry to care dates, healthy start screening acceptance and breastfeeding initiation. This comparison may identify some system issues that can be corrected to ensure data accuracy in Florida CHARTS.

Next Steps

The sub-committee members agreed to meet quarterly to advance progress with short and long-term goals. The next meeting is scheduled for May 22, 2019.

Chronic Disease Subcommittee

The Chronic Disease subcommittee met on March 5, 2019 in Monticello, Florida. Local providers and persons interested in chronic disease services in Madison County were present at the meeting.

The group reviewed the status of the 2018 workplan and barriers or issues that prevented the completion of objectives. From there, the group developed the goals, strategies, objectives and action steps listed below for 2019.

The subcommittee decided to continue working with North Florida Community College nursing students to address healthy food options in businesses, a method that will complement the diabetes and hypertension work already taking place in the community. The group also decided that there should be group presentations on chronic diseases given to community groups to emphasize the need to change current health trends in the community. The subcommittee will continue to address screening opportunities for breast cancer and prostate cancer.

Next Steps

The sub-committee members agreed to meet quarterly to advance progress with short and long-term goals. The next meeting is scheduled for June 4, 2019.

Goals, Strategies and Objectives

I. Social and Mental Health

Three-Year Goal

- Social and Mental Health providers will maintain a consistent presence in Madison County and will establish an effective linkage and referral system by December 31, 2021

Strategy

- Partner with mental health providers and the Mental Health Council of the Big Bend to determine the needs of Madison County residents

Short-Term Objectives for Completion by March 31, 2020

- Create and distribute a survey to gather more information on accessing services (stigma, perception)
- Expand and enhance the referral process for family services between participating agencies

Healthy People 2020 Alignment

- These goals, strategies and objectives align with the Healthy People 2020 Goal: Improve mental health through prevention and by ensuring access to appropriate, quality mental health services.

II. Maternal and Child Health

Three-Year Goal Late Entry to Care

- Reduce late entry to care by 5% for Healthy Start and health department prenatal clients by December 31, 2021

Strategy Late Entry to Care

- Partner with the Healthy Start Coalition and TMH Family Residency Program to analyze 2016 and 2017 data to determine where to make system improvements

Short-term Objectives for Late Entry to Care for Completion by March 31, 2020

- Perform analysis to ensure that there is no data collection issue that results in artificially high prenatal entry to care after the first trimester rates
- Partner with the pregnancy center in Madison to train their volunteers on referrals
- Create a family planning and preconception health outreach campaign for women
- Continue to offer the Sexual Risk Avoidance program in the school district to encourage healthy choices and sexual abstinence
- Partner with Workforce Development to offer at least one job fair during the cycle
- Identify a community partner that can offer a life skills curriculum to middle and high school students

Three-Year Goal Breastfeeding Initiation

- Increase breastfeeding initiation by 10% for Healthy Start and health department prenatal clients by December 31, 2021

Strategy Breastfeeding Initiation

- Use peer counseling and lactation consultants to educate pregnant women on the benefits and importance of breastfeeding

Short-term Objectives for Breastfeeding Initiation for Completion by December 31, 2018

- Perform analysis to ensure that there is no data collection issue that results in artificially low breastfeeding initiation rates
- Continue to extend prenatal appointments at the health department by 30 minutes for women in their third trimester to allow for time to meet with a lactation consultant and increase participation in the WIC breastfeeding support groups
- Identify safe places to breastfeed in the community
- Create a marketing campaign to educate and encourage breastfeeding

Healthy People 2020 Alignment

- These goals, strategies and objectives align with the Healthy People 2020 Goal: Improve the health and well-being of women, infants, children, and families.

III. Chronic Diseases

Three-year Goals Diabetes

- Have a functional Diabetes Prevention Program
- Have a functional Diabetes Self-Management Education Program

Strategy Diabetes

- Pursue funding and mentorships to establish and maintain a Diabetes Prevention Program (DPP) and a Diabetes Self-Management Education Program (DSME)
- Pilot DSME class by June 30, 2020 by implementing Standards 8-9 of the ADA Guidance for Establishing an Accredited DSME
- Ensure all DPP pre-course requirements are in place
- Pilot DPP class by March 31, 2020

Short-term Objectives for Diabetes for Completion by December 31, 2018

- Implement Standards 1-7 of the ADA Guidance for Establishing an Accredited DSME by December 31, 2019
- Offer Diabetes Prevention pilot class by the end of 2018

Three-year Goal Cardiovascular Disease

- Increase the number of healthy food options in at least two food establishments by December 31, 2021

Healthy People 2020 Alignment

- These goals, strategies and objectives align with the Healthy People 2020 Goal: Reduce the disease burden of diabetes mellitus (DM) and improve the quality of life for all persons who have, or are at risk for, DM.

Strategy Cardiovascular Disease

- Partner with community agencies to educate the public and businesses on the importance of healthy food options

Short-term Objectives for Cardiovascular Disease for Completion by March 31, 2020

- Work with local restaurants and food vendors to identify healthy food options in their establishments
- Community health education and awareness presentations to civic groups, faith-based groups and local government

Healthy People 2020 Alignment

- These goals, strategies and objectives align with the Healthy People 2020 Goal: Improve cardiovascular health and quality of life through prevention, detection, and treatment of risk factors for heart attack and stroke; early identification and treatment of heart attacks and strokes; prevention of repeat cardiovascular events; and reduction in deaths from cardiovascular disease.

Three-year Goal Cancer

- Partner with an agency to offer breast, prostate and colon cancer screenings at least annually by December 31, 2021

Strategy Cancer

- Partner with an agency that provides cancer screening and treatment to offer services to residents

Short-term Objectives for Cancer for Completion by March 31, 2020

- Community health education and awareness presentations to civic groups, faith-based groups and local government
- Partner with a mobile cancer screening unit or utilize hospital services
- Promote the Holiday Challenge and virtual walk campaign county-wide

Healthy People 2020 Alignment

- These goals, strategies and objectives align with the Healthy People 2020 Goal: Reduce the number of new cancer cases, as well as illness, disability, and death caused by cancer.

IV. Health Equity

Three-year Goal Health Equity

- Establish shared understanding across all sectors in Madison County concerning information and issues surrounding Health Equity (HE), Cultural Competency/Sensitivity, and how Social Determinants of Health (SDOH) influence the health of Florida's residents and communities by December 31, 2021.

Strategy Health Equity

- Offer training opportunities to CHD staff and to local partner agencies

Short-term Objectives for Health Equity for Completion by March 31, 2020

- Develop and implement a training program for CHD staff
- Incorporate health equity into community presentations
- Work with FSU School of Nursing and the Healthy Start Coalition to develop and implement a research study on pregnant women and support systems

Healthy People 2020 Alignment

- These goals, strategies and objectives align with the Healthy People 2020 Goal: Throughout the next decade, Healthy People 2020 will assess health disparities in the U.S. population by tracking rates of illness, death, chronic conditions, behaviors, and other types of outcomes in relation to demographic factors including:
 - Race and ethnicity
 - Gender
 - Sexual identity and orientation
 - Disability status or special health care needs
 - Geographic location (rural and urban)

Action Plan - Social and Mental Health

Three-Year Goal: Social and Mental Health providers will maintain a consistent presence in Madison County and will establish an effective linkage and referral system by December 31, 2021

Strategy: Partner with mental health providers and the Mental Health Council of the Big Bend to determine the needs of Madison County residents

Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Create and distribute a survey to gather more information on accessing services (stigma, perception) 	<ul style="list-style-type: none"> Complete data sampling from property appraiser's database Develop survey tool Obtain IRB approval if needed Administer survey Enter data Analyze data and complete report 	3/31/2020	Madison CHD Subcommittee	<ul style="list-style-type: none"> Survey data entered into database/data analysis report
<ul style="list-style-type: none"> Expand and enhance the referral process for family services between participating agencies 	<ul style="list-style-type: none"> Convene meeting of providers and the Department of Children and Families Review existing referral procedure and implement enhancements Maintain quarterly meetings to discuss issues 	3/31/2020	Madison CHD Madison County Memorial Hospital	<ul style="list-style-type: none"> Documented referral procedure

Policy change considerations: Enhance referral procedures based on the findings from surveys and provider feedback.

Action Plan – Maternal and Child Health

Three-Year Goal: Reduce late entry to care by 5% for Healthy Start and health department prenatal clients by December 31, 2021				
Strategy: Partner with the Healthy Start Coalition and TMH Family Residency Program to analyze 2017 and 2018 data to determine where to make system improvements				
Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Perform analysis to ensure that there is no data collection issue that results in artificially high prenatal entry to care after the first trimester rates 	<ul style="list-style-type: none"> Pull a sample of Healthy Start and health department prenatal clients to obtain entry to care dates Compare these dates to birth clerk data collection at time of delivery Present findings to the hospital and DOH Vital Statistics 	3/31/2020	Madison CHD Healthy Start Coalition	<ul style="list-style-type: none"> Comparison of birth clerk data collection to documented prenatal care entry dates for Healthy Start and Health Department Clients
<ul style="list-style-type: none"> Partner with the pregnancy center in Madison to train their volunteers on referrals 	<ul style="list-style-type: none"> Meet with the pregnancy center staff to offer training Schedule and hold training Track referrals 	3/31/2020	Madison CHD Healthy Start Coalition	<ul style="list-style-type: none"> Number of patient referrals to health department prenatal care
<ul style="list-style-type: none"> Create a family planning and preconception health outreach campaign for women 	<ul style="list-style-type: none"> Market family planning services to health department clients and other venues in the community Market preconception health classes 	3/31/2020	Madison CHD Healthy Start Coalition	<ul style="list-style-type: none"> Increase in family planning services obtained at the health department Increase in preconception health course participants
Policy change considerations: Enhance referral procedures based on the findings from surveys and provider feedback.				

Madison County Memorial Hospital does offer radiology services that includes outpatient scheduled obstetric ultrasounds.

Madison County Memorial Hospital does not have the personnel or financial resources to assist in this goal.

Three-Year Goal: Reduce late entry to care by 5% for Healthy Start and health department prenatal clients by December 31, 2021				
Strategy: Partner with the Healthy Start Coalition and TMH Family Residency Program to analyze 2017 and 2018 data to determine where to make system improvements				
Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Continue to offer the Sexual Risk Avoidance program in the school district to encourage healthy choices and sexual abstinence 	<ul style="list-style-type: none"> Offer curriculum according to program guidance Document student opt-out percentage 	3/31/2020	Madison CHD	<ul style="list-style-type: none"> Decrease in teen births and repeat births to teens per Florida CHARTS
<ul style="list-style-type: none"> Partner with Workforce Development to offer at least one job fair during the cycle 	<ul style="list-style-type: none"> Identify a location and date for the job fair Advertise in the community 	3/31/2020	Madison CHD Workforce Development NFCC	<ul style="list-style-type: none"> Decrease in unemployment rates per Florida CHARTS Decrease in teen births and repeat births to teens per Florida CHARTS
<ul style="list-style-type: none"> Identify a community partner that can offer a life skills curriculum to middle and high school students 	<ul style="list-style-type: none"> Curriculum to include job interviewing skills, resume building skills, managing finances, applying to colleges or technical schools 	3/31/2020	Madison CHD Partners TBD	<ul style="list-style-type: none"> Decrease in teen births and repeat births to teens per Florida CHARTS
Policy change considerations: Renew efforts to gain support for the adoption and implementation of evidence-based and sustained programs for teen pregnancy prevention.				

Three-Year Goal: Increase breastfeeding initiation by 10% for Healthy Start and health department prenatal clients by December 31, 2021				
Strategy: Use peer counseling and lactation consultants to educate pregnant women on the benefits and importance of breastfeeding				
Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Perform analysis to ensure that there is no data collection issue that results in artificially low breastfeeding initiation rates 	<ul style="list-style-type: none"> Pull a sample of Healthy Start and health department prenatal clients to breastfeeding initiation data Compare these dates to birth clerk data collection at time of delivery Present findings to the hospital and DOH Vital Statistics 	3/31/2020	Madison CHD Healthy Start Coalition	<ul style="list-style-type: none"> Comparison of birth clerk data collection to documented breastfeeding data for Healthy Start and Health Department Clients
<ul style="list-style-type: none"> Continue to extend prenatal appointments at the health department by 30 minutes for women in their third trimester to allow for time to meet with a lactation consultant and increase participation in the WIC breastfeeding support groups 	<ul style="list-style-type: none"> Develop and advertise breastfeeding support groups to increase participation Work with Tallahassee Memorial Hospital "Milk with Mommy" campaign Meet with TMH Family Residency staff to ascertain what messages they are giving to patients 	3/31/2020	Madison CHD TMH Family Residency Program Healthy Start Coalition WIC	<ul style="list-style-type: none"> Comparison of breastfeeding initiation rates prior to program implementation and after program implementation

Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Identify safe places to breastfeed in the community 	<ul style="list-style-type: none"> Buy signage and place in businesses and government offices that identify breastfeeding areas 	3/31/2020	Madison CHD Subcommittee	<ul style="list-style-type: none"> Number of breastfeeding friendly establishments after program implementation
<ul style="list-style-type: none"> Create a marketing campaign to educate and encourage breastfeeding 	<ul style="list-style-type: none"> Buy signage and educational materials 	3/31/2020	Madison CHD Healthy Start	<ul style="list-style-type: none"> Comparison of breastfeeding initiation rates prior to program implementation and after program implementation
Policy change considerations: Establish and communicate to the public safe places in the community to breastfeed.				

Madison County Memorial Hospital does not have the personnel or financial resources to assist in this goal.

Action Plan – Chronic Diseases

Three-Year Goal: Establish and Maintain an Accredited Diabetes Self-Management Education Program by December 31, 2021				
Strategy: Pursue funding and mentorships to establish and maintain a Diabetes Prevention Program (DPP) and a Diabetes Self-Management Education Program (DSME)				
Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Implement Standards 1-7 of the ADA Guidance for Establishing an Accredited DSME by December 31, 2019 	<ul style="list-style-type: none"> Ensure staff are adequately trained Develop curriculum and procedure manual Obtain the input of clinicians and potential participants Establish an advisory board 	12/31/2019	Madison CHD Madison County Memorial Hospital	<ul style="list-style-type: none"> Curriculum and procedure manual is approved by DSME mentor
<ul style="list-style-type: none"> Pilot DSME class by June 30, 2020 by implementing Standards 8-9 of the ADA Guidance for Establishing an Accredited DSME 	<ul style="list-style-type: none"> Work with mentor to establish action plan 	6/30/2020	Madison CHD Madison County Memorial Hospital	<ul style="list-style-type: none"> Documented course evaluations and sign-in sheets
Policy change considerations: Adopt and implement standards of an accredited diabetes self-management education program				

Three-Year Goal: Establish and Maintain an Accredited Diabetes Prevention Program by December 31, 2021				
Strategy: Pursue funding and mentorships to establish and maintain a Diabetes Prevention Program (DPP) and a Diabetes Self-Management Education Program (DSME)				
Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Ensure all DPP pre-course requirements are in place 	<ul style="list-style-type: none"> Ensure staff are adequately trained Develop procedure manual that includes documents required by CDC for accreditation. 	12/31/2019	Madison CHD Madison County Memorial Hospital Big Bend AHEC	<ul style="list-style-type: none"> Completed CDC checklist with supporting documentation
<ul style="list-style-type: none"> Pilot DPP class by March 31, 2020 	<ul style="list-style-type: none"> Ensure billing mechanism is in place 	3/31/2020	Madison CHD Madison County Memorial Hospital Big Bend AHEC	<ul style="list-style-type: none"> Documented course evaluations and sign-in sheets
Policy change considerations: Adopt and implement standards of an accredited diabetes prevention program.				

Three-Year Goal: Increase the number of healthy food options in at least two food establishments by December 31, 2021				
Strategy: Partner with community agencies to educate the public and businesses on the importance of healthy food options				
Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Work with local restaurants and food vendors to identify healthy food options in their establishments 	<ul style="list-style-type: none"> NFCC School of Nursing will utilize nursing students to work with establishments in both counties as group assignments. DOH-Jefferson/Madison staff will work with NFCC to create FAQ documents for nursing students to utilize, obtain access to nutritionists if needed and work to print new menus. 	3/31/2020	Madison CHD NFCC School of Nursing Madison County Memorial Hospital	<ul style="list-style-type: none"> Student New menus showing the healthier items
<ul style="list-style-type: none"> Community health education and awareness presentations to civic groups, faith-based groups and local government 	<ul style="list-style-type: none"> Develop a sample presentation that can be used in the different forums (PowerPoint, flyers, hand-outs, etc.) Ascertain which community partners want to co-present Schedule presentations with organizations 	12/31/2019	Madison CHD Madison County Memorial Hospital	<ul style="list-style-type: none"> Presentation to Rotary Club in Jefferson County on May 11, 2018. Social determinants of health base presentation is complete and distributed to partners. We will build on this to do presentations.
Policy change considerations: Incentivize businesses to increase access to healthy food options.				

Three-Year Goal: Partner with an agency to offer breast, prostate and colon cancer screenings at least annually by December 31, 2021				
Strategy: Partner with an agency that provides cancer screening and treatment to offer services to residents				
Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Community health education and awareness presentations to civic groups, faith-based groups and local government 	<ul style="list-style-type: none"> Develop a sample presentation that can be used in the different forums (PowerPoint, flyers, hand-outs, etc.) Ascertain which community partners want to co-present Schedule presentations with organizations 	3/31/2020	Madison CHD Madison County Memorial Hospital	<ul style="list-style-type: none"> Documentation of event or presentation via sign-in sheets, advertisements or other documentation as appropriate
<ul style="list-style-type: none"> Partner with a mobile cancer screening unit or utilize hospital services 	<ul style="list-style-type: none"> Priorities are breast cancer, lung cancer and colorectal cancer Madison County Memorial Hospital has a full-service laboratory and offers mammography and endoscopy services 	3/31/2020	Madison CHD Madison County Memorial Hospital	<ul style="list-style-type: none"> Advertisements of screening events Aggregate numbers of persons screened with no identifiers
<ul style="list-style-type: none"> Promote the Holiday Challenge and virtual walk campaign county-wide 	<ul style="list-style-type: none"> Advertise the event community-wide Check into the cost per participant Pursue the possibility of making this a competition event 	12/31/2019	Madison CHD Community Partners	<ul style="list-style-type: none"> Number of participants
Policy change considerations: Regularly provide evidence of need, offer best practice screening materials, and aggregate data regarding need across the community.				

Action Plan – Health Equity

Three-Year Goal: Establish shared understanding across all sectors in Madison County concerning information and issues surrounding Health Equity (HE), Cultural Competency/Sensitivity, and how Social Determinants of Health (SDOH) influence the health of Florida’s residents and communities by December 31, 2021.

Strategy: Offer training opportunities to CHD staff and to local partner agencies

Short-Term Objectives	Action Steps	Due Date	Agency Responsible	Indicator
<ul style="list-style-type: none"> Develop and implement a training program for CHD staff 	<ul style="list-style-type: none"> Obtain suggested training courses from HQ Require levels of training for all staff, depending on their role 	3/31/2020	Madison CHD	<ul style="list-style-type: none"> TRAIN transcripts or sign-in sheets from training
<ul style="list-style-type: none"> Incorporate health equity into community presentations 	<ul style="list-style-type: none"> Prior to educating the community on chronic diseases and maternal and child health, incorporate health equity into the presentations 	3/31/2020	Madison CHD Madison County Memorial Hospital	<ul style="list-style-type: none"> Documentation of event or presentation via sign-in sheets, advertisements or other documentation as appropriate
<ul style="list-style-type: none"> Work with FSU School of Nursing and the Healthy Start Coalition to develop and implement a research study on pregnant women and support systems 	<ul style="list-style-type: none"> Assist with any IRB approval Work with partners to implement the project 	3/31/2020	Madison CHD Healthy Start Coalition FSU	<ul style="list-style-type: none"> Final data analysis report findings

Policy change considerations: Convene community organizations to promote linkages, develop community resource materials, and advocate for activities that impact social determinants of health.

Meeting Minutes

Purpose:

Community partners meet to discuss the Community Health Improvement Plan priority areas and plan activities to address the priority areas.

Topic
Welcome/Call to Order <ul style="list-style-type: none">Pam Beck, Operations Manager with the Florida Department of Health in Jefferson and Madison Counties welcomed everyone to the meeting and asked if everyone would introduce themselves.
Discussion of Family Services <ul style="list-style-type: none">Pam stated that she had specifically asked Nan Baughman of Refuge House to be present today due to one of the last things on this year's plan being domestic violence and or family services. She noted that we would like to see what we can do in Jefferson County as well as what may be going on in Jefferson County.Pam passed around a handout from Partnership with Strong Families that speaks to what is happening in Madison County which is why she feels like we should be talking about what is going on in Jefferson County. She noted that Partnership for Strong Families does not cover Jefferson County, and asked Nan if she would mind speaking on some of the needs she sees in the Jefferson Community.Nan responded by saying the biggest issue is getting people to come forward when there is domestic violence and child abuse. She stated that nobody in Jefferson County wants anybody to know their business. She said she has been in the community speaking and really trying to get those that see something to say something and if CPI needs to go investigate they will and if they find nothing, that is great. Nan also stated that since Refuge House is a certified domestic violence center they are supposed to be receiving incident reports from law enforcement, but they have not been receiving any. She isn't sure if people are not reporting it because they are afraid nothing will be done about it.Pam thanked Nan for her input and stated that she thinks that serves Jefferson County in the capacity the Partnership for Strong Families serves Madison County is Big Bend Community Based Care. She said she believes this may need to be a separate meeting to discuss getting the services to Jefferson County. She also proposed that this be added to next year's action plan.

Apalachee Center Inc.
January 22, 2019 10:00 a.m. to 11:00 a.m.

Meeting Minutes

Review Progress to Date on Action Plan

- Pam moved on to talk about closing out the year one action plan and planning the activities for the year two action plan. She stated that the only things left on year one's action plan are the survey and the family services area. She noted that we did get \$7,500 to do the survey. She said she has traded emails back and forth with Dan Thompson and Meade Grigg and we will probably pay Dan as a contractor. She noted that we must spend the money by June 30. She explained that this does not mean the survey must be completed by June 30. Pam also said that both property appraiser offices said we could utilize their data for the survey and that she would like to talk to FSU about working with their students for the process.
- Betsy Wood with FSU asked Pam how we were planning to conduct the surveys. Pam stated we were thinking we would send it out first via USPS to an address and if that doesn't work we will have to start visiting.
- Pam stated she would like to complete the data presentation before we talk about year two. At this time, she started the presentation.

Updated Data Presentation

- Pam gave a data presentation on the most recent data so that the group could use the information to decide on activities for year two. She explained that this data would be in the updated CHA that will be completed in March.

Development of Year 2 CHIP Activities

- Pam asked if the group that the survey and family services was enough to continue to focus on in year two, or if they would like to add something else. Jay Reeve, CEO of Apalachee said that once we have the results from the survey we could use that to develop a strategic plan. Pam said she agreed and felt these projects were going to be big projects that will require a lot of partner involvement. The group confirmed that these two areas were enough and that we would move forward through year two with the survey and family services.

Next Meeting Date and Location

- The group decided that the next meeting will be held on April 16, 2019 at 10:00 a.m. at Apalachee Center Inc.

Meeting Evaluation

- Chelsey asked the group to complete the evaluation attached to the back of their meeting packet.

February 12, 2019 10:00 a.m. to 11:00 a.m.

Meeting Minutes

Purpose:

Community partners meet to discuss the Community Health Improvement Plan priority areas and plan activities to address the priority areas.

Topic
Welcome/Call to Order <ul style="list-style-type: none">Pam Beck, Operations Manager with the Florida Department of Health in Jefferson and Madison Counties welcomed everyone to the meeting and asked everyone to take a moment to introduce themselves.
Data Analysis <ul style="list-style-type: none">Pam explained that the primary purpose of this meeting is to go over some Maternal and Child Health data and decide what the group would like to start working on in April. She stated that the current action plan for year one activities ends in March.Pam presented the data presentation to the group.
Action Plan Update/Year Two Priorities <ul style="list-style-type: none">Upon completing the data presentation, Pam asked the group for suggestions on year two activities for the Maternal and Child Health action plan. Prenatal care was suggested by Dr. Bob Auston, a retired M.D. and Madison County resident. Pam responded to the suggestion by saying that if we focus on prenatal care she would like to look back at women who delivered in 2017 and see if they did in fact have prenatal care. She then asked the group what their thoughts were on the idea. Dr. Auston responded by saying we're on the right track.Ann Mi Pinello with FDLRS Gateway asked if there was partnership with our local schools where we could speak to young women on this topic. Pam responded that the Health Department has an SRA program that teaches 6-8 classes. She explained that the classes teach healthy decision making but they do not promote one birth control over another because they are really teaching abstinence. Lisa Hayes, Operations Manager with the Florida Department of Health in Jefferson and Madison Counties asked Ann if she was suggesting that prenatal care be taught to the young women in schools. Ann responded by saying that she doesn't think the young women know where to go or what to do when they get pregnant. Lisa stated that young women who participate in the SRA classes in Jefferson and Madison do know where to go if they get pregnant. Ann stated that it doesn't sound like knowledge is the barrier for prenatal care in our county. Lisa responded saying it shouldn't be but could be. Lisa stated she believes transportation is more of a barrier.Pam furthered the conversation by saying that educating the community is somewhat an issue. She stated that it's hard to know where you can put things for women to see that they

Meeting Minutes

can go to the Health Department for prenatal care. She suggested doing an educational campaign with local hairdressers, faith-based community, and billboards to get the information out there.

- Donna Hagan, Director of Healthy Start Coalition Jefferson, Madison, and Taylor stated that she is more concerned with family planning (baby spacing and the number of unplanned pregnancies). She stated that she would like for us to do something in our communities on family planning.
- Pam stated she could work on some objectives around verifying prenatal care and marketing family planning services in a more effective manner.
- For further discussion Pam noted that many of the teen pregnancies occur in the summer because they are bored. This started discussion on things that can be offered to kids in the summer to keep them occupied. The new police Athletic League (PAL) was mentioned and Pam stated she was looking into partnering with them on doing a summer camp.
- Peer counseling was brought up by the group as well, and Pam stated she would work on an objective around it.
- To recap, Pam stated she had four areas listed that would be focused on for year two. These include: prenatal care, family planning, a community action piece with youth, and breastfeeding with peer counselors.

Next Meeting Date and Location

- The group chose May 22, 2019 as the next meeting date. The meeting will take place in Madison at 10:00 am, location to be determined.

Group Announcement's

- No group announcements.

Meeting Evaluation

- Pam requested the group complete the evaluation attached to the back of their meeting packet.

Adjourn

- There being no further business, Pam expressed their sincere thanks for everyone's attendance and input and the meeting adjourned.

Meeting Minutes

Purpose:

Community partners meet to discuss the Community Health Improvement Plan priority areas and plan activities to address the priority areas.

Topic
Welcome/Call to Order <ul style="list-style-type: none">Chelsey McCoy, Human Service Program Specialist with the Florida Department of Health in Jefferson and Madison Counties welcomed the group to the meeting and asked everyone to introduce themselves.
Data Presentation <ul style="list-style-type: none">Pam presented the most recent data for Chronic Disease in Jefferson and Madison County. After the presentation, she asked the group if they had any questions, comments, or suggestions about the data.Dr. Bob Auston, a retired MD and resident of Madison County suggested that in the future we check with South Georgia Medical Center and Tallahassee Memorial Healthcare about statistics for Jefferson and Madison County. Pam responded to Dr. Bob and stated that Tallahassee Memorial's data is included in the presentation but she doesn't think South Georgia Medical Center's information is in Florida CHARTS which is where she pulled the data.Melissa Dancer-Brown, Director of Health Promotion at Tallahassee Memorial Healthcare asked Pam if she looked at type break-out of all types of cancers? Pam responded no, and said when she writes the Community Health Assessment she would.
Develop Year 2 Activities <ul style="list-style-type: none">Pam briefly went over what the activities were for year 1 with the group. One of the year 1 activities being the DPP and DSME, and Pam asked that it also be carried over into year 2. She also asked to extend the restaurant project that the NFCC BSN students are working on into year two. The group agreed. She then asked the group if they had any suggestions on year two activities?Melissa Dancer stated that TMH has a couple of programs that they offer in schools, one being a nutrition program that is for preschool and kindergarten and one for elementary. The program focuses on teaching kids the importance of reading nutrition labels and portion sizes. She stated that it is a very interactive program that gets the kids involved. She also noted that they have a program called Happy Hydrators which is a two-week program. Chelsey stated this may be something that could be incorporated into Every Kid Health Week which is a part of Healthiest Weight Florida.Dr. Bob Auston noted the use of the billboards in each county as a year two activity. Pam stated that we use them as often as possible, and have some new information that should be showing up on them soon.

Florida Department of Health in Jefferson & Madison County
Community Health Improvement Plan Meeting-Chronic Disease
Jefferson County IFAS Extension Office
March 5, 2018 2:30 p.m. to 3:30 p.m.

Meeting Minutes

- The group agreed that we would host the breast cancer awareness events again in year 2.
- The group also discussed some objectives on the Church clinic that is held in Madison County and working with other Churches and the Senior Center on transportation.
- It was also decided that Colorectal Cancer screenings would be incorporated into year two. Pam stated that the Health Department would work to figure out we could get at home testing kits to promote screenings.
- Group discussed a step challenge utilizing the Holiday Challenge virtual walk app that begins in December. The step challenge would be a competition between Jefferson and Madison County.

Colorectal Cancer Event

- Chelsey passed out a flyer for a Colorectal Cancer Awareness event that will be held on March 20, 2019 at the Lee Library and she also announced that there will be a second Colorectal Cancer event held at the Greenville Public Library on March 29, 2019.

Next Meeting Date and Location

- The group chose June 4, 2019, 2:30 to 4:30 p.m. at the Madison County Senior Citizen Center.

Group Announcements

- Tonya Bell reminded everyone to check out the Healthy Start resource calendar for the upcoming Shared Services meeting since the meeting dates have changed.

Adjourn

- There being no further business, Pam and Chelsey expressed her sincere thanks for everyone's attendance and input and the meeting adjourned.
